DAN DOMINGUEZ
2007-2011 (served 2 terms)

After 18 years of waiting, Dan was elected the president of PAMET Northern California on April7, 2007. This was a dream come true for him.

With all the changes happening in the Clinical Science field, he felt he needed to expand the activities to be more visible and receptive to the needs of the general membership. He continues to offer 2 review classes a year, encountering students who have been out of the profession for more than 10 years.

He continued the tradition of offering 4 Continuing Seminars but instead, he holds it in different sites like the Monogram Bioscience in South San Francisco, Washington Hospital in Fremont and at Kaiser Hospital in Vallejo and Kaiser Vacaville. Having it done in various places helped increase membership, and is currently now being recognized as an excellent provider of Continuing Education Seminars in the bay area.

More than anything else, he continued the community services by volunteering and participating in the following activities: Relay for Life for American Cancer Society, Neurofibromatosis Walk, Tuberous Sclerosis Alliance Walk and Avon Walk for Breast Cancer. Few casino trips have also played an important role in raising funds, meeting new faces and serves as a form of relaxation. He also initiated break times from the busy planned activities every year by having a get together retreat (Reno) and watching Broadway (theater) shows a few times a year.

Dan helped in organizing and the formation of PAMET Sacramento West Valley Chapter, the 17th chapter of PAMET-USA, Inc. It has been his desire to expand the membership in all the Northern California region to bring more unity and service to all licensed and unlicensed Clinical Laboratory Scientists and our profession.

Dan's quote:

"The pleasure of serving on a voluntary basis that is founded upon the idea of making a difference to someone has been and will always be the true spirit that we as officers of this organization proudly carry on."
