LETICIA ACOSTA
1997-2001 (served 2 terms)

Letty became the 4th chapter president who was inducted at the Spenger's restaurant in Berkeley on June 28, 1997.

The past four years have truly been productive in terms of what we have accomplished as a professional organization to make a difference on the lives of our fellow medical technologists.

During this period, seven officers have been elected to the National board. We have successfully completed our 16th Review Class for Clinical Laboratory Scientists to obtain their license.

We have issued 500 certificates for Continuing Education Units for license renewal. This equates to 15 seminars throughout the years, having obtained the license two years before.

We have granted Scholarship Awards to four High School Seniors, children of active PAMET members who excelled academically, and were also active in extracurricular activities.

Our membership roster was growing through our seminars and review classes.

We have successfully sponsored our fund-raising projects with our Reno trips and Christmas Caroling.

We have participated in Health Fairs.

Approved by the State of California Health Services, we supported seminars and provided units to other PAMET chapters throughout the country, especially Southern California, Indiana, New Jersey and Texas.

Actively participated in the National Conventions and Executive meetings, especially in the Technical and Educational Projects:

Virginia Beach, Virginia- 1998

Mexican Riviera Cruise---2000
